

WE LIVE AND BREATHE IN A CHEMICAL SOUP

Asthmatic Attacks • Allergic Reactions
Watery Eyes • Coughing/Colds • Dizziness
Lethargy • Breathing Problems
Chicken Pox • Measles • Many Others
Mold Spores • Fungi • Bacteria • Viruses

"Mutant strains of the microbials (germs) that cause diseases have become resistant to the antibiotics used to kill them."

Centers for Disease Control & Prevention

Our lungs act as filters preventing contaminants from entering the blood stream. This is effective for the particles larger than 4 microns but most (98%) of these contaminants are smaller than 1 micron. It is critical to remove these microscopic particles to achieve healthy indoor air quality.

There are 40 million allergy sufferers in the United States who, like most people, spend 90% of their time indoors.

A third party test showed 98.6% of virus inactivated within 2.5 air exchanges. We recommend continuous fan operation for best results. (Results vary with the efficiency of every system.)

OUR UVC GERMICIDAL LAMPS ARE 3 TIMES MORE POWERFUL THAN THE AVERAGE COMPETITOR'S.

- Two-year lamp life.
- Lifetime warranty on electronics.
- Germicidal UV is the trusted method used in hospitals.
- Verified Ozone Free

Available only through your HVAC Professional.

WE HAVE SOLUTIONS FOR ALL YOUR INDOOR AIR QUALITY PROBLEMS

The Centers for Disease Control and Prevention presents this analysis of the causes and aggravation of allergies.

"Only 10% of homes in the USA have an efficient air cleaning system."

ASHRAE

Although you may not be able to see, smell, or touch it, air pollution impacts the health of everyone.

BACTERIA, VIRUSES & FUNGI

**PROTECT
YOUR
BABY!**

"Old methods used to clean inside air simply don't work"

University of California - Berkeley - Wellness Letter

"As a result of today's energy efficient, tight or closed building construction, the air in our homes and workplace is always 2-5 times more polluted than the worst exterior air."

Environmental Protection Agency

Most homes are full of pollutants that can't escape. They are locked inside and people breathe them, suffer from them and need to find a solution for them.

UV systems control bacteria, viruses and fungi. UV systems with odor control also oxidize gases and toxins.

Take control of your indoor environment and stop suffering bouts with allergies, influenza, colds, lethargy, sleeplessness, skin and respiratory irritations.

Clean air is your passport to a healthier life.
